Welcome to my Presentation

Honourable Principal Sir of Pattamundai Collage, Head of the department and Faculty members of Commerce Department of Pattamundai Collage.

My dear lovely students, other participants of this web seminar I invite you all to participate in this seminar, understand the theme and enjoy the seminar. I welcome you all to my presentation on Tax planning and Management in Indian Economic life.

Dear colleagues and students, we the human beings fearing two things i.e. death and payment of tax. But death is managed by the almighty while payment of tax should be managed by the payers. The payers may be an individual, HUF, partnership firm, company, cooperative society and any other judicial person.

During two days in a year we honour our mother India i.e. on Independence day and Republic day. But mother India will be happy if we pay her dues in the form of tax. A tax is a mandatory financial charge or some other type of levy imposed upon a tax payer by our mother India through its government. Thus taxes are levied by the government to meet the various public welfare expenditure like defence, education, healthcare and infrastructure, etc. To make our Indian economy healthy all the tax payers should have moral obligation to pay tax according to the various Act and rules. Taxation is a fiscal tool to achieve economic, social, regulatory and developmental objectives. In India we have two types of taxes i.e. Direct tax and Indirect tax. Direct tax is regulated by central board of direct taxes while Indirect tax(Goods and Service tax) is regulated by central board of indirect taxes.

Both central government and state government are empowered to levy taxes in accordance with tax laws. As income tax law in India regulates direct taxes, the components of the law are as follows:

- Income Tax Act, 1961
- Annual finance Act
- Income tax rules
- Circulars/ Notifications of tax Authorities(CBDT)
- Legal decisions of the courts

Tax management has become crucial in today's economic life. Tax management professional like Tax consultants, Financial Accountants, Financial Advisors and Wealth managers are talking on playing vital role in the field of Tax planning and management with tax laws becoming more and more stringent in India and incorporation of Aadhar with every monetary aspect in India, career prospects in Taxation, tax planning and tax management has reached a new high.

Tax Planning

Tax planning implies that the use of legitimate tax shelters: Deductions Exemptions, Allowances, Rebates to reduce the tax liability to the minimum. Thus, tax planning is defined as an arrangement of one's financial and economic affairs by taking complete legitimate benefits of all deductions, exemptions, and allowances and rebates so that the tax liability reduces to minimum. There are four types of tax planning:

- Short Range Tax planning
- Long Range Tax planning
- Permissive Tax planning
- Purposive Tax planning

As tax planning is futuristic in nature, So objective of tax planning is to reduce the tax liability to the minimum . The benefits of tax planning are substantial particularly in the long run as it is very wide in its coverage an one should understand that Tax planning includes Tax Management.

Tax Management

As tax management is a part of tax planning, so it refers to the Compliance with the statutory provisions of law. It is mandatory which includes maintenance of accounts according to the provisions of < tax laws, filing of tax returns u/s 44AB, Payment of taxes, deducting tax at source and timely payment of advance tax etc. poor tax management may lead to levy of interest, penalty, prosecution etc. In some cases, it may lead to heavy financial loss if proper compliance is not made, e.g/ if loss of return is not filed in time it will result in financial loss because such loss will not be allowed to be carried forward.

Scope of Tax planning
