 - Construction and Engineering industries
- SERVICE SECTOR**
 - Tourism & Hospitality
 - Transportation
 - Healthcare
 - Information Technology (IT)
 - Banking Financial Service and Insurance (BFSI)
 - Media & Entertainment
 - Retail

THANK YOU

EFFECT OF PANDEMIC COVID-19 ON INDIAN HIGHER EDUCATION

1. INTRODUCTION

The impact of pandemic COVID-19 is observed in every sector around the world. The education sectors of India as well as world are badly affected by this. It has enforced the world wide lock down creating very bad effect on the students' life. Around 32 crores learners stopped to move schools/colleges and all educational activities halted in India. The outbreak of COVID-19 has taught us that change is inevitable. It has worked as a catalyst for the educational institutions to grow and opt for platforms with technologies, which have not been used before. The education sector has been fighting to survive the crises with a different approach and digitising the challenges to wash away the threat of the pandemic. Under this background, this presentation highlights some measures taken by Govt. of India to provide seamless education in the country. Both the positive and negative impacts of COVID-19 on education are discussed and some fruitful suggestions are also pointed to carry out educational activities during the pandemic situation.

2. OBJECTIVES

The present research paper focused on the following objectives:

- To enlighten various measures taken by Govt. of India for education sector during this pandemic.
- To highlight various positive impact of COVID-19 on education
- To enlist some negative impacts of COVID-19
- To put some effective suggestions for continuing education during the pandemic situation.

3. METHODOLOGY

Data and information presented in current study are collected from various authentic websites, journals and e-contents.

4. INITIATIVES OF GOVT. OF INDIA ON EDUCATION DURING COVID-19

For Secondary Education

- Diksha portal
- e-Pathshala : an e-Learning app
- National Repository of Open Educational Resources (NROER)

For Higher Education

- Swayam: online education platform hosting 1900 courses
- Swayam Prabha : 32 DTH TV channels
- e-PG Pathshala : platform for ebooks, online courses and study materials for PG Students

5. POSITIVE IMPACT OF COVID-19 ON EDUCATION

- Move towards Blended Learning
- Rise in use of Learning Management Systems
- Enhance the use of soft copy of learning material
- Improvement in collaborative work
- Rise in online meetings-
- Enhanced Digital Literacy
- Improved the use of electronic media for sharing information:

- Worldwide exposure
- Better time management
- Demand for Open and Distance Learning (ODL)

6. NEGATIVE IMPACT OF COVID-19 ON EDUCATION

- Educational activity hampered
- Impact on employment
- Unprepared teachers/students for online education
- Reduced global employment opportunity
- Increased responsibility of parents to educate their wards
- Loss of nutrition due to school closure
- Limited or no access to digital world
- Payment of Schools, Colleges fee got delayed

7. CONCLUSION

COVID-19 has impacted immensely to the education sector of India. Though it has created many challenges, various opportunities are also evolved. The Indian Govt. and different stakeholders of education have explored the possibility of Open and Distance learning (ODL) by adopting different digital technologies to cope up with the present crisis of COVID-19. India is not fully equipped to make education reach all corners of the nation via digital platforms. The students who aren't privileged like the others are suffering due to the present choice of digital platforms.

8. SUGGESTIONS

- India should develop creative strategies to learning during pandemic COVID-19 for all including students of remote regions, marginalised and minority groups.
- Establishment of quality assurance mechanisms and quality benchmark for online learning programmes must be developed
- Govt and educational institutes should plan to continue the educational activities maintaining social distancing. 30-40% students and teachers may attend schools/colleges in two shifts per day to carry on educational activities by obeying guidelines for COVID-19.
- There is a need to deploy public funds to fix the internet gap and ensure that students continue to learn digitally. The state governments/private organisations should come up with ideas to address this issue of digital education.
