<p><b>Objective:</b> 1.To explain the importance of waste management for environmental sanitation. 2.To evaluate the problems of solid waste and liquid management. 3.To distinguish between hazardous and non-hazardous waste and their management. 4.To discuss about the need of effective waste management policies.</p>	<p><b>Outcomes:</b> 1.Students were well aware regarding waste management and environmental sanitation. 2.Students came to know the meaning and relevance of waste management for the betterment of our environment. 3.The '3R's of managing waste: Reduce, Reuse &amp; Recycle' was the most vital outcome. 4.Students also learned how creating recyclable products support effective waste management.</p>

**Report of the Event:**

On the third day of the ongoing lecture series organized by the Environment Committee, a lecture was given on the topic 'Waste Management'. Mr Shanti Swarup Biswal, Research Associate, School of Infrastructure, IIT Bhubaneswar was the esteemed resource person of the event. Mr Dilipkumar Bhuyan esteemed principal of the college presided over the meeting and welcomed all the dignitaries on to the dais followed by guest introduction by Mrs Shubhashree Pothal, Lecturer in Political Science. The head of the committee Mrs Suchismita Biswal, Lecturer in Botany delivered a keynote address on the concerned topic. After that, Mr Biswal explained the necessity of waste management for a cleaner and greener environment. His lecture mostly focused on the management of hazardous waste and solid waste generated inside the college premises. He then explained the concept of '3R's' i.e., Reduce, Recycle and Reuse of waste for a cleaner and greener environment. In the discussion session all the doubts of students were well explained and feedback assessment was done regarding the lecture which was found to be very satisfactory. It was very fascinating to see that students have proposed incredible idea for waste management and environment sanitization form their own. At last, Mr. Alok Kumar Sahu, Lecturer in Philosophy proposed a vote of thanks.

## A. Carp culture

Carp culture pond is basically three tier culture system, where the first step begins with the rearing of spawn up to fry (2-3 cm) stage for 2-3 weeks in **nursery ponds**. Fry to fingerlings (8-12 cm) in **Rearing ponds** Fingerlings to table-size fish in composite fish culture ponds or **Stocking ponds**.

Key Steps in Management of three tier carp farming system

- Pre-stocking management
- Stocking management
- Post stocking management

### 1. Pre-Stocking Management

#### Pond preparation

- Drying/dewatering
- desilting /bottom mud excavation
- dike & canal reconstruction
- Plough / tilling of the pond bottom
- Eradication of aquatic weeds such as eichornia, lemna, azolla, pistia etc.
- Eradication of undesirable fishes & predators such as Snakeheads, boal, chital, Puntius, Climbing perch, cat fishes

**Pond Conditioning** – Liming- a layer of lime is spread over the bottom of the pond for two weeks. It removes the acidity of the soil and also kills unwanted soil organisms.

**Water filling**- When a pond is fully prepared for stocking of fish then water filling is done. Initially before manuring/fertilizing the water depth should be maintained as low as possible so that the effect of nutrients for natural food production is fully realized. After 1 to 2 weeks of manuring / fertilizing the water depth has to be raised to the required level before stocking the seeds for fish culture.

**Manuring & fertilization**- apply manure to develop fish food like phytoplankton and zooplankton.

- Cow Dung @ 10,000 kg/ha;
  - Poultry manure @ 5000 kg/ha
  - Apply at least 15 days prior to stocking
  - Usually peak plankton production would occur after 7 days of application of PM & in case Cow dung, it will be 10-12 days.
  - Inorganic fertilizers are avoided as they give rise to phytoplankton blooms
- Eradication of Insects: removal of aquatic insect such as beetles, back swimmer, water stick insect, water scorpion using **soap oil emulsion** 1:3 ratio (18 kg soap & 56 Kg veg. oil)

### 2. Stocking and Post stocking management:

This phase includes the activities to be undertaken from stocking of spawn/fry/fingerlings up to the final harvesting of fish from the pond.

The activities are manuring, feeding, growth & health monitoring, water quality monitoring & harvesting.

**Manuring:** Pond manuring / fertilizing should be done monthly or fortnight at regular intervals & the quantities should be in split doses.

**Stocking and feeding:**

- 2.5-10 million seed is stocked per ha. Spawn are fed 1- 5 days @ 4 times daily
- Fry- 0.1-0.3 million seed per hectare, feeding@ 5-8% bw 2-4 times daily
- Fingerlings- 10,000-12,000 per hectare, feeding @3% bw twice daily.

**3. Regular sampling of fish:** During each sampling data relating to fish health & growth rate has to be properly recorded.

**4. Harvesting:** Harvesting of fish means the complete removal of fish from the pond at the end of production.

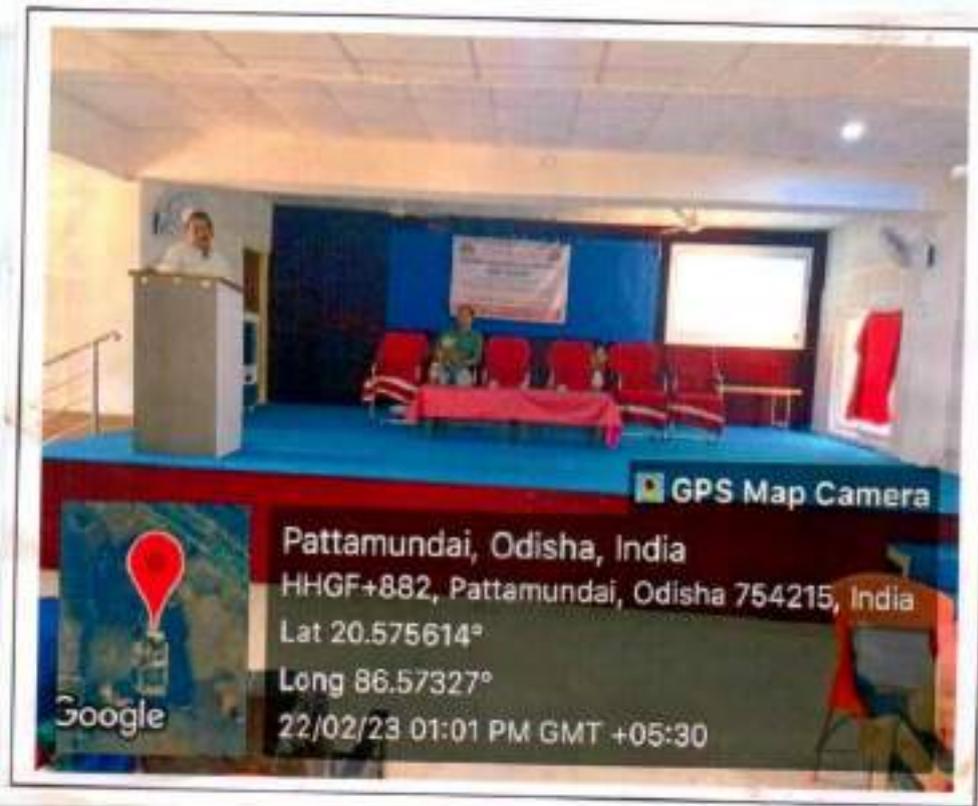

**B. Preparation of fish pickle:**

Materials	Quantity	Materials	Quantity
Fish meat	1000g	Mustard (Powder)	25g
Ginger	150g	Fenugreek	10g
Garlic	200g	Garam masala	10g
Green chili	200g	Sugar	10g
Turmeric powder	10g	Vinegar	350ml
Chilli powder	50g	Sodium benzoate	0.5g
Cumin powder	35g	Refined oil	400ml
Coriander powder	15g	Citric acid	5g
Salt (to taste)	70g		

**Method:**

1. Wash the fresh fish in water
2. Dress the fish by removing head, fins, scales and gut. Cut into fillets
3. Cut the fillets into shape of small cubes of uniform size (about 2cm)

1. Wash the fresh fish in water
2. Dress the fish by removing head, fins, scales and gut.
3. Pick the meat free of bones
4. Chop the meat to very small size and mix with little salt
5. Boil potato for 15 minutes, cool, peel and mash into fine paste
6. Make paste of onion, ginger, garlic and green chilli
7. Fry this paste in little oil
8. Add fried paste and mashed potato into the chopped fish meat
9. Add salt, besan, garam masala, pepper powder, chilli powder, turmeric powder, MSG, baking powder and mix well into dough
10. Make cutlet shape taking 25g of dough
11. Make slurry of rice powder and little salt
12. Dip the raw cutlet in slurry of rice powder
13. Roll over bread crumbs
14. Deep fry in oil until golden brown colour and serve hot with sauce.
15. For restaurant, pack the breaded fish cutlet in polythene bags and store in deep freezer (-20°C) and keep well for 3 months.

# STUDY TOUR CUM FIELD VISIT

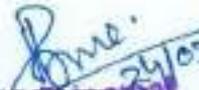

Department of Chemistry

## REPORT

The students of department of chemistry visited **ICAR – NATIONAL RICE RESEARCH INSTITUTE**, Cuttack on 24-02-2023 as **STUDY TOUR CUM FIELD VISIT** programme as part of their curricular activities. Twenty two students with two faculty members reached the institution at 10 A.M. on that day which was pre scheduled with kind negotiation of the director Dr. A.K. Nayak, Principal Scientist ICAR – NRRI, Cuttack. He gladly welcomed the students as well as the faculty members with their team of experts who cooperated the team with details different activities undergoing inside the institution. First he allowed the students to visit the beautiful museum where different kinds of hybrid paddies, rice, cereals were displayed. Then the team visited rice processing units where students learnt about the details of processing of paddies to fine quality rice. Also the team visited the instrumentation center to get information about functioning of instruments like NC Soil Analyzer, FTIR, Gas Chromatography, Open Top Chambers, Eddy Covariance System, ICP-MS, and NIR etc. Then the team visited the bio chemical fertilizer laboratory where the different scientist tried to explain the utility of bio chemical fertilizers over chemical fertilizers. They emphasized the students to encourage their parents, villagers and the public in different formats to use the bio chemical fertilizers in place of chemical fertilizers which not only environment friendly but cheap as well as make disease free products. The scientist also exhibited different insects displayed in this unit and explained the particular bio chemical fertilizers which used to kill the particular insects. Dr D Parida, HOD Chemistry and Mr Ranjan Kumar Gahan accompanied the students in the said visit. The students thank members of the guiding team.
