Career in Finance

Labanya Prakash Jena, CFA

Structure of the Financial System

FIGURE 1 How Financial Institutions Provide Financing for Firms

- The financial system helps link savers with spenders who need money to achieve a variety of goals
- Savers cannot analyze, plan, and execute all saving and spending activities on their own, so intermediaries are needed to support these activities either directly or indirectly.
- Within the financial system, the investment management industry offers a range of products and services to savers and spenders to channel funds

Jobs in Finance: Types of Career Opportunities

Quantitative & Analytical Roles

- Data Scientist
- Data Analyst
- Research Analyst
- Risk Analysts & Risk Managers
- Foreign Currency

Client Facing Roles

- Financial Analyst
- Private Wealth Managers
- Investment Consultant
- Client servicing

Transaction-focused Roles

- Lending and investing
- Investment Banking
- Investment Strategist
- Stock Broker
- Sales & Trading
- Portfolio Manager
- Private Equity

Jobs in Finance: Quantitative & Analytical Job Skills

Mathematical Skills

- Statistical Inference
- Forecasting
- Financial modeling
- Financial risk analysis
- Valuation

Programming Skills

- Python programming
- R programming
- Data visualization
- SQL querying
- Database architecture
- Machine learning techniques

Communication Skills

- Project management capabilities
- Cross-functional teamwork
- Workflow process management
- Explaining complex concepts to a non-expert audience

Jobs in Finance: Client Facing Job Skills

Financial Knowledge

- Investment strategy & processes
- Performance measurement & risk management
- Familiarity with financial analysis tools

Communication Skills

- Public speaking
- Using data to tell a story
- Persuasion
- Negotiation
- Emotional intelligence

Business Knowledge

- Expertise in client's sector
- Awareness of regulatory environment
- Commitment to ethical best practices

Jobs in Finance: Transaction Focussed Job Skills

Financial Transaction Knowledge

- Understanding of markets & exchanges
- Portfolio management & execution
- Knowledge of asset classes & investment vehicles

Personality Traits

- Entrepreneurial mindset with enthusiasm for driving profit
- Willingness to work hours that correlate to global market openings & closings
- Comfort working in fast-paced environments

Other Key Skills

- Analytical & problem-solving skills
- Project management
- Interpersonal skills
- Meticulous recordkeeping

Ref No. :176.....

Date.....13/02/2023.....

To

Dr. Surya Narayan Mishra, Chief Scientist

Krishi Vigyan Kendra, Kendrapara

Sub:-Seeking Permission to have a field visit on 14-02-2023.

Esteemed Sir

I have the honour to request your kind heart to the fact that the students and teachers of Botany Department of this institution are interested to have a field visit to your centre on 14-02-2023 as part of curricular event.

Therefore necessary permission may be accorded at your end for the said visit.

With Regards.

(Dr. Premalata Rout)
Principal
Pattamundai College

REPORT ON STUDY TOUR

A field visit was organized on dt.14.02.23 by the Department of Botany, Pattamundai College, Pattamundai to Krishi Vigyan Kendra which is present at Jajhangaof Kendrapara district of Odisha. The spot was nearly 18kms away from Pattamundai. 20 students were participated in this visit along with the staffs of the Department. Tapas Ranjan Sahoo, Subject matter specialist interacted with students and give information about agricultural technologies. Prabhanjan Mishra scientist, horticulture briefed about KVK and its activities. Students witness the methods involved in the organic farming and types of traditional cultivation. Interaction section was with student had a great exposure and gained a lot of information from the scientists about various techniques and methodologies that are carried in modern agriculture field. Students saw some exotic species like Dragon fruit, strawberry etc. They learned about the process of vermicomposting and Azolla culture. At last we returned back to Pattamundai at 4 p.m. and reached our destination at 4.30 p.m. It was a memorable journey for all of us.

.....

SEMINAR ON
"INDIA G-20 AND THE 21ST CENTURY WORLD ORDER"

Organised by:
Department of Political Science
Pattamundai College, Pattamundai

DT.21.02.2021

AGENDA

1. Welcome address by **Dr. Premalata Rout**, Principal, Pattamundai College
2. Introduction of guest by **Miss Simangini Das**, Lecturer in Political Science
3. Theme paper presentation by **Dr. Nibedita Pradhan**, HOD, Political Science.
4. Presentation by Resource Person **Prof. Chinmaya Kumar Pradhan**, Former Principal, Government Autonomous College, Angul.
5. Vote of thanks by **Mrs Shubhashree Pothal**, Lecturer in Political Science

- This is because the **role of the United Nations and the World Trade Organization** in securing cooperation between donor and recipient country groups is **losing centrality**.
- There are now **three socio-economic systems** — the G7, China-Russia, and India and the others — and they will jointly set the **global agenda**.
- **Ukraine's long shadow, rival finance, the expanding influence** of the trade and value chains **dominated by the U.S. and China**, and the **reluctance of developing countries to take sides in the strategic competition** as they have a real choice **require fresh thinking on the nature and form of collaboration from the G20**.
- The primary role of the G20 **needs to be reoriented to prevent a clash of ideas to the detriment of the global good**.

AGENDA, THEMES, AND FOCUS AREAS THAT INDIA SHOULD SET FOR THE 2023 G20 SUMMIT:

- Need for a new conceptual framework:
- The **presumed equality that all countries are in the same boat**, recognized in the case of climate change, **needs to be expanded to other areas** with a global impact **redefining 'common concerns**.
- **Emerging economies are no longer to be considered the source of problems needing external solutions but the source of solutions to shared problems**.
- The **BRICS provides an appropriate model** for governance institutions suitable for the 21st century where a **narrow group of states dominated by one power will not shape the agenda**.
- The starting point should be **building on the global consensus in the Vienna Declaration on Human Rights 1993 reaffirming the indivisibility of all human rights**.

- There is a growing recognition of economic and social rights — for example, in the 2030 Agenda for Sustainable Development.
- Ensuring adequate food, housing, education, health, water, and sanitation and work for all should guide international cooperation.
- Principles of common but differentiated responsibilities for improving the quality of life of all households can guide deliberations in other fora on problems that seem intractable in multilateralism based on trade and aid.

Economic diversification through science and technology:

- The global agenda has been tilted towards investment, whereas science and technology are the driving force for economic diversification, sustainably urbanizing the world, and ushering the hydrogen economy and new crop varieties as the answer to both human well-being and global climate change.
- Innovation supports dematerializing production and consumption and moving towards renewable sources of energy.
- The shift in lifestyles in the post-war period created urban jobs in services and retail that made up for the losses to high productivity manufacturing, and climate change.
- A forum to exchange experiences on societal benefits and growth as complementary goals would lead to fresh thinking on employment and the environment.

Harnessing the potential of the digital-information-technology

- Harnessing the potential of the digital-information-technology revolution requires redefining digital access as

a **“universal service”** that goes beyond physical connectivity to sharing specific opportunities available.

- For global society to reap the fruits of the **new set of network technologies**, open access software should be offered for more **cost-effective service delivery options, good governance, and sustainable development.**

Collaboration in Space technology:

- **Space is the next frontier for finding solutions** to problems of natural resource management ranging from **climate change-related natural disasters** and **supporting agricultural innovation to urban and infrastructure planning.**
- **Analysing Earth observation** data will require regional and international collaboration through existing centres that have massive computing capacities, machine learning, and artificial intelligence.
- **Open access to geospatial data, data products, and services and lower costs of geospatial information technology facilities do not require huge financial resources.**

Collaboration for public health:

- **Public health** has to learn from the **COVID-19** fiasco with infectious diseases representing a market failure.
- A major global challenge is the **rapidly growing antimicrobial resistance** which **needs new antibiotics and collaboration** between **existing biotechnology facilities.**

Avoiding strategic competition

- Overriding priority to development suggests **avoiding strategic competition.**
- Countries in the region will support **building on the 1971 UNGA Declaration** designating for all time the Indian Ocean as

- a zone of peace and non-extension into the region of rivalries and **conflicts that are foreign to it.**

Revival of Global Financial Transaction Tax:

- A **Global Financial Transaction Tax**, considered by the G20 in 2011, needs to be revived to be **paid to a Green Technology Fund for Least Developed Countries.**

Conclusion:

- India's presidency of G20 is **an opportunity to reinvigorate, reinvent and re-centre the multilateral order.**
- India must leave the G20 with the **agility and energy to respond to new realities, and it must create a future-ready multilateralism through a novel and robust institutional architecture.**

Seminar on " India, G-20 and the 21st Century World Order"
